

Ontological Coaching Workshop in North America

November 2022

Following our very successful inaugural online *Ontological Coaching workshop* for North America in 2021, we are delighted to announce the workshop is being offered again in November of this year.

This long-standing, globally acclaimed and ICF endorsed foundation workshop has been running since 1996 in Australia, New Zealand, South Africa, the USA, the UK, Asia (Hong Kong & Singapore) and Europe (Netherlands, Belgium and Switzerland).

The workshop is facilitated by **Alan Sieler and Karen White**. Based in Australia, Alan's four books on the ontological approach to coaching, leadership and business improvement (*Coaching to the Human Soul: Ontological Coaching and Deep Change*) have positioned him to be regarded as the world's leading authority on Ontological Coaching. He collaborates with Karen, an ICF Master Certified Coach and experienced coach trainer, who lives in South Africa.

Alan and Karen have been co-facilitating with each other in-person and online in South Africa, the UK, Europe and the USA for 10 years. In their collaboration they elegantly dance conversationally with each other in the facilitation process.

Although Ontological Coaching has been around for more than thirty years, many have not heard of it, let alone experience its positive power for profound change. The workshop is highly practical with many opportunities for deep self-reflection and change, as well as the development of the basic skills of Ontological Coaching. When people experience this approach they describe it as "the next big thing in coaching" because of its simultaneous depth and pragmatism.

"A wonderful experience and the depth of the workshop was excellent. I thought it was excellent for personal growth, and for coaching and facilitating. I am a master coach with the ICF, but the ontological coaching approach seems much more integrated, and better quality. I am already applying it in my work in career coaching and in coaching middle management. What particularly resonated were the whole area of the body and the importance of not making presumptions."

Deborah Kinkead, Senior Manager, Telecommunications Company, Australia

"Was it worth it? There is no money in the world that could make me go back in time and undo the experience of this workshop! It was not just a learning experience but a very healing one too. Every minute, all content and every detail, wording and intonation all contributed to an experience that took learning to a deeper level than I ever experienced. As a clinical psychologist, Gestalt therapist, NLP trained and co-active coach (MCC) I'm not exactly new to the field of coaching and training. I can definitely advise anyone who wants to integrate earlier learning at a deeper level to join this workshop and potentially the longer program after that (as I did) to finally integrate all insights in their own personal way of being.

John van Roij, executive coach and organisational facilitator, Netherlands
